Generator V-belt tensioner

The DCP Generator V-belt Tensioner is a replacement for the currently factory mounted tensioner. The factory tensioner needs an extra hand and tool to keep tension to the adjuster while tightening the securing nuts. The DCP tensioner only needs fingers and 2 open end spanners for the same job. Once installed, tensioning the generator belt is as easy as pie!

Advantages:

- * All Stainless Steel tensioner, bolts, nuts and washers
- * Only two open-end spanners needed
- * Better control of the correct tension of the belt
- * Your fingers can do the tensioning job

Tensioner kit consists of:

- 1 Stainless Steel Adjuster body
- 2 Stainless Steel Rod Ends (1 right hand, 1 left hand threaded)
- 2 Stainless Steel Securing nuts
- 2 Stainless Steel bolts and nuts
- 4 Stainless Steel washers
- 1 Stainless Steel spring washer
