Small Credit Card Wallet

In Europe governments are preparing a change from paper car and driver documents to credit card size documents. In The Netherlands all cars imported into the country will be issued the car registration and owner documents (title) in credit card format. Driver's licenses are already issued in credit card format.

DCP is proud to offer owners of a DeLorean DMC-12 a new small size wallet that has 4 credit card slots and on both sides also space for slightly larger documents (e.g. MOT/APK/Emissions approval document and insurance paper).
