Seat Protection Cover

Working on a car is not without risking damage to the panels or other parts in the way of your actions. Therefore a protecting cover is very useful to prevent scratches in paint, on the stainless surface or interior. Even dropping of tools on protected parts may not lead to damage, of course depending on the weight of the tool and the severeness of the impact.

The material is soft, flexible, with a metallic gloss and is flame retardent.

Material used	Vinyl Ultrashine
Thickness	1,10 mm
Weight	500 gram per meter ²
Butane Flame Test	IMO Res. A.652
Cigarette Test	UNI EN 1021-1/93
